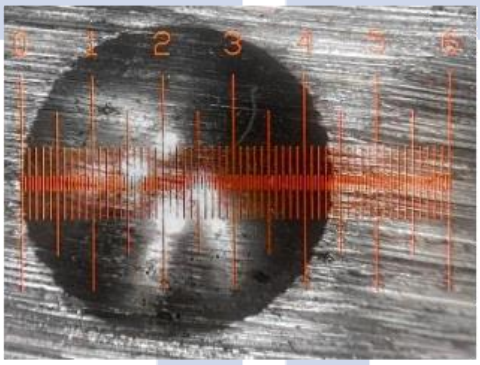
Foundrax BRINscope Manual Brinell Microscopes

BRINscope and BRINscope Duo

ONE Foundrax BRINscope manual Brinell microscope, choice of either standard or new **Duo** models. Both models offer a special lens construction needing no adjustment to the eye, and are fitted with a proprietary Foundrax integral LED light source which features a momentary switch to prevent accidentally leaving the illumination switched on.



The new, patent-pending, illuminated graticule in the BRINscope Duo

The **Duo** models also offer a patent-pending illuminated graticule option, giving the user a far greater flexibility when measuring certain indentations. Traditionally, microscope graticule lines are black, and this can mean that the indentation edge is not always as clearly defined against the measuring scale as it could be. When the graticule is illuminated, the lines turn from black to red to give excellent definition of the measuring scale over the indentation edge and therefore makes the measurement process very much easier.

With official UKAS Certificate of Calibration to BS EN ISO 6506-2 and ASTM E10. Supplied in protective casing.

Speciale tecnologia ottica di lenti autofocalizzzanti che non richiede regolazioni di messa a fuoco.

Struttura in acciaio inossidabile praticamente indistruttibile.

Lampada con tecnologia LED con vita utile di 360 ore.

Microscopio certificato UKAS.

UKAS CALIBRATION
0231

MADE IN THE UK
